

LUCIFER LIGHTING LOOKBOOK VOL. 2 SUMMER 2021

LUCIFER
LIGHTING COMPANY

EDITOR'S NOTE

The circumstances of this last year turned many of us inward. Because we spent more time in our homes, we asked a lot more of our domestic sphere: it now had to operate as professional, educational, functional, and entertainment space, as well. In response to these changes, we noticed a marked increase in interest about improving interior lighting to get more value and enjoyment from what was already around us.

As we look ahead, we find our gaze traveling up, out, farther forward, beyond the literal and virtual walls that contained us. The pages of this lookbook are filled with ideas about using light to enhance and expand our expectations of what interior space can do.
