

# **LUCIFER LIGHTING LOOKBOOK VOL.1 WINTER 2020-2021**

**LUCIFER**  
LIGHTING COMPANY

# A NOTE FROM US

The following pages are filled with enticing architecture, interesting spaces, and beautiful art, furniture, and objects. As you look through these photographs, you may not even notice the fixtures that light up these incredible interiors. And this is just as we want it to be. Because at Lucifer Lighting, we design, engineer, and manufacture our fixtures to enhance what they illuminate, without drawing attention to themselves.

You'll also find some new products – the elegant STELLR® Pendant and the high output CY4 Cylinder – that make more of a statement. But our goal remains the same: to provide architects and designers with the light that illuminates their most creative visions.

We are humbled and honored to be the favorite fixture of so many industry-leading professionals. But most of all, we are inspired by them. I'm sure you will be, too.

To create architecture  
is to put in order. Put  
what in order?

Function and objects.
